

HARIOM TAVAR

Builder | AI Automation & Backend Development

+91-9753564070 | hariomtavar7@gmail.com | [GitHub](#) | [LinkedIn](#) | Indore, Madhya Pradesh

SUMMARY

B.Tech Computer Science student who builds and ships working applications rather than just studying theory. Regular daily user of Claude and ChatGPT for both development and problem-solving; have integrated the OpenAI API into two production-style projects for GPT-based features, and experimented with n8n to build a workflow connecting an API to a spreadsheet-based database. Comfortable reading documentation and figuring out unfamiliar tools independently — most of my projects were built without a course or tutorial guiding the process. Backend experience with REST APIs, Node.js, and Express gives me a head start on how data moves between systems. Placed 4th out of 600+ participants and Top 10 globally among 7,500+ participants at two AI hackathons, both built and shipped within 24 hours.

RELEVANT SKILLS

AI & LLMs: OpenAI API (GPT-4), Prompt Engineering, Daily use of Claude & ChatGPT

Automation: n8n (workflow automation — API-to-database sync), REST API integration

Backend & Data: Node.js, Express.js, Spring Boot, MongoDB, MySQL, Python (Pandas, NumPy)

Other Languages: Java, JavaScript, C, C++

Tools: Git, GitHub, Postman, VS Code, Docker

THINGS I'VE BUILT

API-to-Database Automation (n8n) | *n8n, REST API, Spreadsheet Database*

- Built a personal n8n workflow that pulled data from an external API and synced it into a spreadsheet-based database automatically, to learn how the platform handles triggers, data mapping, and API auth.

Voynar — AI-Powered Learning Platform | *OpenAI API, React.js, Spring Boot, MongoDB* [\[GitHub\]](#)

- Integrated a GPT-4 mentor system via the OpenAI API, using prompt engineering to personalize responses and generate adaptive learning roadmaps.
- Built the backend REST API (Spring Boot) and MongoDB data layer myself, end to end, without a tutorial to follow.

SearchAI — AI Tool Decision Engine | *React (Vite), Tailwind CSS, Client-Side Filtering Logic* [\[GitHub\]](#)

- Built a recommendation engine that filters 20,000+ AI tools and matches them to a user's described task, surfacing why each match was picked.

EduTrack — Full-Stack Classroom Management System | *React.js, Node.js, Express.js, MongoDB* [\[GitHub\]](#)

- Built the full application myself — database schema, REST API, and role-based UI — to automate student attendance tracking across multiple classrooms.

HACKATHONS

- 4th out of 600+ participants — AI WebForge Challenge (built & deployed a working AI-powered app in 24 hours)
- Top 10 globally — Elite Hack 1.0 (7,500+ participants, 900+ teams worldwide)

CERTIFICATIONS

- Generative AI Models & Advanced Prompt Engineering — Microsoft
- AWS Cloud Practitioner Essentials — Amazon Web Services (AWS)

EDUCATION

B.Tech — Computer Science & Engineering

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

2024 – 2028

CGPA: 8.72 / 10.0
