

HARIOM TAVAR

AI/ML Intern | Generative AI Developer | Full Stack Developer
+91-9753564070 | hariomtavar7@gmail.com | [GitHub](#) | [LinkedIn](#) | Indore, Madhya Pradesh

PROFESSIONAL SUMMARY

B.Tech Computer Science student (8.72 CGPA) with hands-on experience building and testing AI-powered solutions using the OpenAI API, prompt engineering, and Python-based data handling (Pandas, NumPy). Experienced in collecting and processing datasets, identifying patterns to power data-driven features, and researching emerging AI/ML trends under real deadlines — including a 4th-place finish among 600+ participants and a Top 10 global ranking among 7,500+ participants at AI-focused hackathons. Microsoft-certified in Generative AI Models & Advanced Prompt Engineering, with strong documentation habits and experience collaborating with developers and designers to ship working prototypes.

TECHNICAL SKILLS

AI / Generative AI: OpenAI API, Prompt Engineering, LLM Integration, GPT-based Solution Design, Data-Driven Recommendation Logic

Programming Languages: Python (Pandas, NumPy), Java, C, C++, JavaScript

Data & Analysis: Data Collection & Filtering, Pattern Identification, MongoDB, MySQL

Web & Backend: React.js, Node.js, Express.js, Spring Boot, REST APIs

Tools: Git, GitHub, VS Code, Postman, Docker

Concepts: DSA, OOP, System Design, Agile, Research & Technical Documentation

PROJECTS

Voynar — AI-Powered Learning & Consistency Platform | *OpenAI API, React.js, Spring Boot, MongoDB* [\[GitHub\]](#)

- Assisted in designing and testing an AI-powered solution by integrating a GPT-4 mentor system via the OpenAI API, using prompt engineering to personalize responses.
- Researched emerging generative AI tools and techniques to curate adaptive learning roadmaps, documenting design decisions for future iterations.

SearchAI — AI Tool Decision Engine | *React (Vite), Tailwind CSS, Client-Side Filtering Logic* [\[GitHub\]](#)

- Collected and processed a dataset of 20,000+ AI tools, applying filtering logic to identify patterns and match tools to task-based user needs.
- Contributed to the design and testing of an AI-powered recommendation engine, translating research on AI tool capabilities into a working intent-matching system.

EduTrack — Full-Stack Classroom Management System | *React.js, Node.js, Express.js, MongoDB* [\[GitHub\]](#)

- Analyzed attendance data to build subject-wise analytics with real-time percentage calculations, surfacing trends for faculty decision-making.
- Collaborated with peers to design, build, and debug the full application, from database schema to role-based UI.

CERTIFICATIONS

- Generative AI Models & Advanced Prompt Engineering — Microsoft
- AWS Cloud Practitioner Essentials — Amazon Web Services (AWS)
- AWS Well-Architected Framework Accreditation — Amazon Web Services (AWS)
- Certificate of Excellence — Oracle Dev Gym (98% score, Databases for Developers: Foundations)
- IBM Enterprise Design Thinking — IBM
- Network Security: Cybersecurity & Ethical Hacking — Udemy
- Advanced Software Engineering Virtual Experience — JP Morgan Chase & Co. (Forage)

ACHIEVEMENTS & COMPETITIONS

- 4th Rank out of 600+ participants — AI WebForge Challenge (researched, built & deployed a working AI-powered application in 24 hours)
- Top 10 globally — Elite Hack 1.0 (7,500+ participants, 900+ teams worldwide) as Team 'The Binary Brains'

EDUCATION

B.Tech — Computer Science & Engineering

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore

2024 – 2028

CGPA: 8.72 / 10.0
